**ALH.115 Basic Health Statistics**

This course is designed to provide students an introduction to terms, definitions, formulae, and computations used in computing health care statistics. Emphasis is on inpatient health care data and statistical computations, but most applications can be transferred to the outpatient or alternative healthcare settings. Statistical skills will be acquired and developed through actual use and analysis of data.

Offered: Fall

Prerequisites: The appropriate placement exam score or take MAT.080 with a grade of C or better or one year of high school Algebra completed in the last three years with a minimum grade of C.

Applicable toward graduation at Sandburg where program structure permits:

Degree or Certificate: AAS, AGS and Certificates where applicable.

General Education – Not Applicable

**ALH.120 Medical Law and Ethics**

Students will be introduced to legal, moral, and ethical issues that are likely to arise as they practice health information management. This course provides an overview of the laws and the ethics needed to provide competent and compassionate care to patients within legal and ethical boundaries. This course will serve as a guide to assist students in resolving legal and ethical questions encountered as a health care provider.

Offered: Fall or Spring

Applicable toward graduation at Sandburg where program structure permits:

Degree or Certificate: AGS, AAS and Certificates where applicable.

General Education – Not Applicable

**ALH.130 Professionalism in Healthcare**

The purpose of this course is to build a professional foundation for those who are entering college-level health care programs or for those who may be interested in pursuing a career in health care. This course will provide topics essential for today’s learner and tomorrow’s health care professional. Students will learn about the health care system, personal traits of the health care professional, relationships, teamwork, and communication in the health care setting, cultural competence and patient care, and the business of caring. The student will gain cognitive (knowledge), psychomotor (skills) and affective (behaviors) of the following fundamental concepts in health care: communication; cultural diversity; personal and professional traits of a health care worker; infection control; critical thinking; healthcare technology; ethical and legal responsibilities; and safety in healthcare. The student should develop and strengthen the professional traits and behaviors needed for today’s health care industry. The student will have the basic knowledge of occupations in health care as it pertains to therapeutic, diagnostic, environmental, and information systems of the health care industry. This course is composed of 32 theory hours.

Offered: Fall or Spring

Applicable toward graduation at Sandburg where program structure permits: Degree or Certificate: AAS, AGS, and Certificates where applicable.

General Education – Not Applicable
This course provides an engaging foundation that will ensure student success in their chosen health care career and establish them along a pathway as a lifelong learner. This course focuses on exploring the student’s strengths and identify areas for improvement of their personal lifestyle management and behaviors for success to work in a health care setting, work with patients, and work with other health care professionals. The student will gain cognitive (knowledge) and affective (behaviors) of the following soft skills: study skills, test taking, self-confidence, attitude and behavior, organization and time management skills, medical language, math skills, critical thinking and reasoning skills, stress management, emotional skills, and professional image in health care setting and after hours. The student will learn to develop action plans and achievable goals to improve their chance of success in school and at work. This course is composed of 16 theory hours.

Offered: Fall or Spring or Summer
