

OXY-FUEL WELDING & CUTTING

Oxy-Fuel Welding & Cutting Certificate

The Oxy-Fuel Welding and Cutting Certificate Program is designed to enable the graduate to succeed in employment as a welder in industry. The graduate will be proficient in oxy-acetylene welding and cutting, arc welding and reading blueprints. Students receive various levels of welding proficiency after successfully completing tests which measure their welding skills.

Labor Market Need for Welders, Cutters, Solderers and Brazers:

2015 Median Pay: \$38,150 per year; \$18.34 per hour

Employment change 2014 - 2024: 14, 400 positions available

Admission to the Program: Open

First-Time Enrollees

1. Complete an application for admission and, if desired, apply for financial aid.
2. Send an official high school transcript or GED score report to the Admissions and Records Office.
3. Complete the placement exam.
4. Meet with an advisor/counselor to select classes and complete the registration process.

Course	Title	Semester Hours
First Year		
Fall Semester		
MAT.101	Technical Mathematics 1	3
MET.100	Metallurgy Fundamentals	2
MFG.100	Introduction to Welding	3
WEL.125	Welding Blueprints	2
WEL.160	Oxyacetylene Welding & Metal Preparation	3
WEL.162	Arc Welding Basics	3
Total Semester Hours		16

Schave, Jamie

instructor, welding

La Londe, Matthew J

instructor, welding

Kellogg, David M

associate dean, career and corporate development

The Center for Manufacturing Excellence (CME) offers classroom space, a computer lab, and houses Carl Sandburg College's industrial programs. Students may take courses in the following subject areas: welding, biofuels, rail, machine tooling, manufacturing or electrical. The electrical lab features a host of components to aid in student learning including AC/DC trainers. In 2014, Sandburg became a designated National Academy of Railroad Sciences (NARS) training site offering courses in locomotive electrical and locomotive mechanical. Instruction is delivered by individuals with industry-specific expertise and includes specialized coursework using technical equipment. Two diesel engines inside the CME are available for training opportunities. The College's welding lab offers 16 bay stations and soon will have an additional ten working spaces. The welding area offers a welding simulator, as well as state of the art multi process welding machines.
